

123NET is excited to announce an important project aimed at bringing high-speed internet to your community, as a part of the large county-wide broadband project and the public-private partnership between Allegan County and 123NET*.

CONSTRUCTION DETAILS

Construction will take place in the right of way, extending 33 feet from the road centerline. You may notice construction activities in these areas as we install the necessary infrastructure. The process involves laying orange conduit, pulling fiber cables into the conduit, and placing white/orange markers along with green pedestals. Please rest assured that a restoration crew will follow the construction to ensure the area is returned to its original condition. If anything is missed, please call our construction hotline: **616.608.9654**.

PROJECT PROGRESS & SERVICE INFORMATION

We have begun construction, and some areas are available for residents to sign up for service. (Please check your address on our website to see if your address is active or the estimated timeline). The service will begin with a speed of 250Mbps and includes unlimited data for \$59 per month. If you are interested in this service, please visit <https://www.123.net/allegan-county/> and click on the "Check Availability" link. If you are in a zone with internet service available, you will be able to sign up. You can also call **888.440.0123** to sign up over the phone.

Thank you for your patience and support as we are working on this significant project. If you have any questions or need further information, please do not hesitate to contact us.

**This project is being funded in part by federal award number CPFFN0190 awarded to The State of Michigan by the U.S. Department of the Treasury through the ROBIN (Realizing Opportunities with Broadband Infrastructure and Networks) Grant, plus Allegan County ARPA (American Rescue Plan Act) Funds and 123NET Capital Investment.*

A Message from the Allegan County Broadband Project:

Our comprehensive plan to bring high-speed internet to the residents of Allegan County is in process. While 123Net will be building fiber to serve over 12,000 residents, there are four other companies building grant subsidized fiber. Rural Digital Opportunity Fund grant projects are planned with Spectrum, Mercury Broadband and Midwest Energy & Communications (MEC.) Bloomingdale Communications is also building fiber with USDA Re-Connect grant funds.

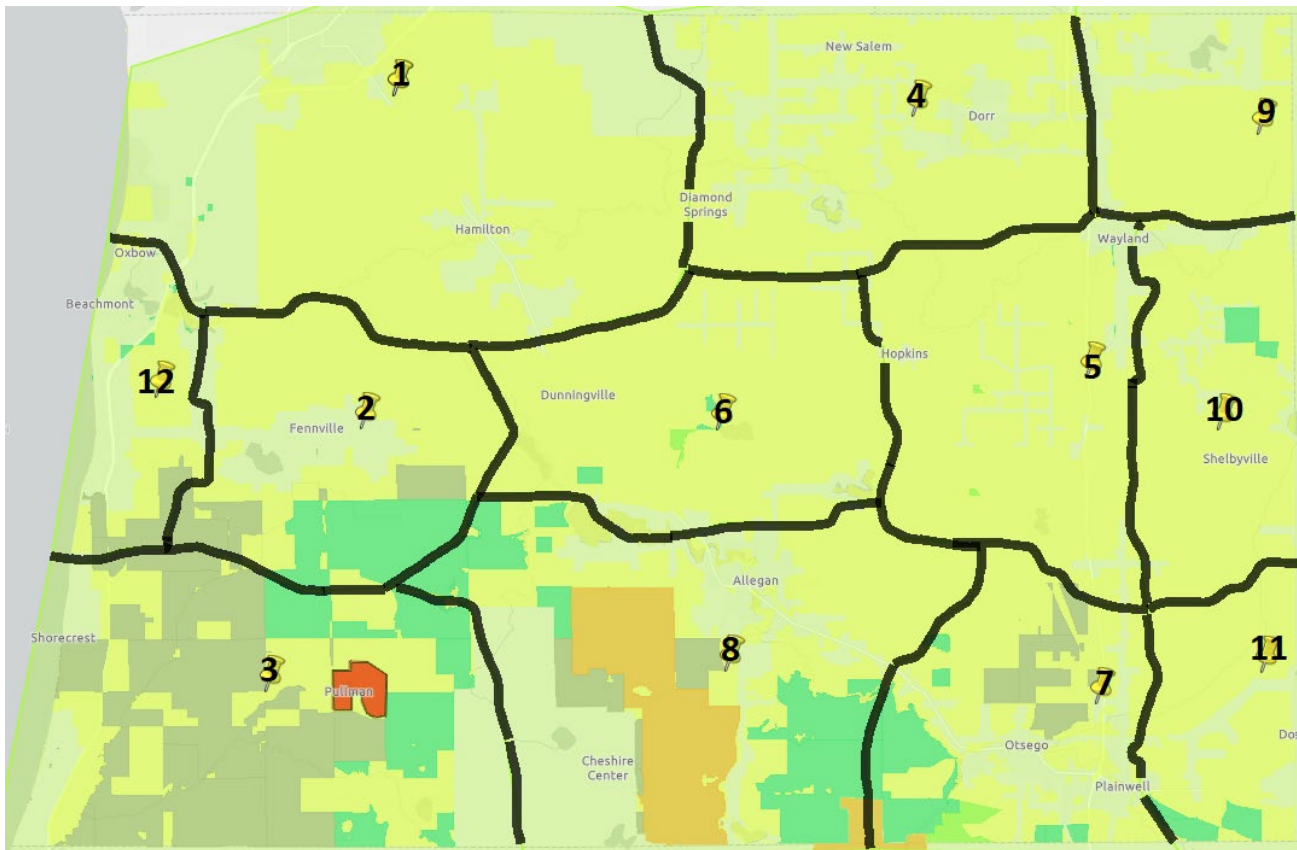

The map below shows the areas for each of these projects. For construction updates, please contact your Provider:

Bloomingdale
Mercury Broadband
MEC
Spectrum
